2025

PENANGPORT
A Member of MMC Group

SENIOR WIREMAN

Facilities & Infrastructure Department

Job Responsibilities:

- Perform installation, wiring, maintenance and repair works for electrical and mechanical installations in accordance with technical specifications, codes, regulations and safety standards to ensure proper functionality.
- Conduct inspection, testing and verification of electrical and mechanical systems to ensure integrity, functionality, regulatory compliance and safe operation.
- Assist in diagnosing, troubleshooting and rectifying electrical and mechanical faults efficiently, including providing appropriate technical solutions.
- Provide technical advice and support on issues related to electrical and mechanical installations, maintenance and repair works.
- Maintain accurate records of work performed, including installation details, maintenance schedules and repair history.
- Assist in reporting any significant issues, non-compliance or safety risks to superiors or relevant authorities.
- Assist in managing spare parts, including collection from inventory or suppliers.
- Ensure all work is carried out in compliance with applicable codes, regulations and safety procedures to prevent accidents and maintain a safe working environment.

Job Requirements:

- Low Voltage Restriction Competency Certificate (PW4) issued by the Energy Commission or an accredited institute.
- Minimum three (3) years of working experience in a similar capacity.
- Valid CIDB Green Card registration.
- Computer proficiency, including Microsoft applications.
- Good planning, organizing and time management skills.
