2025

PENANGPORT
A Member of MMC Group

TECHNICIAN (ELECTRICAL)

Facilities & Infrastructure

Job Responsibilities:

- Respond to repair and maintenance requests as instructed by Planners, Engineers or equivalent, and provide technical support for electrical facilities–related issues.
- Conduct regular site inspections to identify damaged equipment or systems requiring rectification.
- Plan, arrange and carry out daily repair and maintenance works while ensuring compliance with safety protocols, procedures, standards and relevant regulations.
- Implement improvement initiatives related to repair and maintenance activities to enhance system performance and reliability.
- Prepare technical specifications, bills of quantities and other documentation required for quotations or tenders involving repair, maintenance, restoration, upgrading and modification works.
- Perform contract-related duties including site visits, monitoring and updating work progress, and supervising or regulating contractors' activities in accordance with prescribed requirements.
- Assist in the setup, installation and commissioning of equipment or systems as required.
- Maintain accurate records by updating daily and monthly reports on repair, maintenance and preventive works until completion.

Job Requirements:

- Certificate of Polytechnic Graduation or equivalent qualification in Electrical Engineering.
- Minimum one (1) year of working experience in a similar capacity; fresh graduates are encouraged to apply.
- Knowledge of OSHE and FMA requirements.
- Valid CIDB Green Card registration.
- Computer proficiency in Microsoft Office applications.

Kindly send your latest Resume with copy of certificates to:

recruitment@penangport.com.my before **31st December 2025**.
